Methodology

Screening Venue: In-house and outside

Screening Party: Appleseed Fund portfolio managers and analysts

Screening Database Used: RiskMetrics Group and TrustSimon

Screening Process: We apply both negative and positive ESG screens to potential investments. We apply negative screens to avoid investment in companies in the fossil fuel industry, tobacco products, alcoholic beverages, gambling, weapons, and pornography. We then apply positive screens measuring company performance related to the environment, human rights, and human health. In addition, we allocate at least 1% of portfolio investments to community investing. When applying our ESG screens, we rely on external research (MSCI) and on our own analysts. We apply our ESG screens at the same time we apply our valuation screens. Only companies that meet both our ESG and valuation criteria qualify for inclusion in the Appleseed Fund.
