Financial Objective: Long term growth of capital

Specific ESG Focus: Pax World offers a unique investment approach it calls Sustainable Investing -- the full integration of environmental, social and governance (ESG) criteria into investment analysis and decision making. By combining rigorous financial analysis with equally rigorous ESG analysis, Pax World portfolio managers seek to identify companies that are leaders in their industries, are better at managing risk, meet positive standards of corporate responsibility and focus on the long term. The inclusion of ESG criteria in the Pax World investment process results in an increased level of scrutiny that helps portfolio managers identify well-managed companies and construct portfolios that they believe have better long-term investment prospects. Environmental Pax World environmental criteria include such issues as air and water emissions, recycling and waste reduction, use of clean and renewable energy, climate change initiatives, and other policies and practices focused on attaining and promoting environmental sustainability. Social Pax social criteria examine companies from three different perspectives -- workplace and supply chain issues, product integrity and community involvement. Governance Pax governance criteria include such issues as executive compensation; board structures; and actions and charters aimed at protecting the interests of stakeholders. In every criterion, Pax seeks companies that disclose policies, implementation programs, and performance.

Methodology

Screening Venue: In-house and outside

Screening Party: Pax World Sustainability Research Department; MSCI ESG Research

Screening Database Used: --

Screening Process: MSCI’s ESG research framework generates an analysis and rating of each company’s management of its environmental, social and governance performance. The rating criteria address a company’s ESG performance in the context of five categories, covering key corporate stakeholders. The categories are: 1) environment, 2) community and society, 3) employees and supply chain, 4) customers including the quality and safety record of a company’s products, and 5) governance and ethics. MSCI applies its proprietary ESG rating framework to each company by selecting the ESG rating criteria most relevant to each firm. To evaluate a company, analysts review more than 500 data points and score more than 100 indicators.
