General Fund Type: Equity Mid-Small Cap

Specific Sizes or Types of Investments: --

Financial Objective: The Walden Midcap Fund seeks long-term capital growth through an actively managed portfolio of stocks of middle capitalization companies.

Specific ESG Focus: The Fund integrates environmental, social and governance (ESG) analysis into the investment selection and company engagement process. Among the issues on which Walden evaluates companies and pursues shareholder engagement are: product safety and desirability, workplace policies and practices, environmental impact, community impact and corporate governance and accountability. The Fund actively promotes corporate accountability and positive change through company dialogue and shareholder resolutions, proxy voting, public policy initiatives, and educational outreach. In doing so, the Fund encourages companies to recognize that the sustainability of their profits is connected, in part, to how they treat workers, customers, communities and the natural environment as valuable, long-term assets.

Methodology
Specific Screening Information by Category

Environment

- **Climate / Clean Technology**: Combination of Positive and Restricted/Exclusionary Strategies - Walden Asset Management shares our clients’ deep concern regarding climate change. To achieve the global emissions reduction required to avoid catastrophic climate change, we believe that priority number one is to develop, enact, and enforce strong public policies that place a price on carbon. Since U.S. and global economic growth remain inextricably linked to fossil fuel use during the transition to a more carbon-constrained environment, the Walden mutual funds pursue a multi-pronged approach that integrates climate change risk in investment decision-making, corporate engagement, and public policy advocacy. Walden favors investment in companies with products and processes promoting energy efficiency and natural resource conservation; strong and transparent greenhouse gas reduction policies, goals, programs, and results; and supportive and consistent public policy positions. More proactively, Walden looks for opportunities to invest in companies with innovative, solutions-oriented technologies such as energy and fuel efficiency, carbon sequestration or renewable energy development. Walden’s investment approach results in portfolios with favorable carbon footprints relative to those of comparable benchmarks.
