Account Minimums

Minimum Account: $2,000
Minimum IRA: $1,000

Methodology
Screening Venue: In-house

Screening Party: Compliance Department

Screening Database Used: Trade Order Management/Compliance

Screening Process: The Calvert Unconstrained Bond Fund is the only mutual fund in the nontraditional bond category to feature the incorporation of environmental, social and governance (ESG) analysis in its investment process. A unique aspect of Calvert’s sector and security selection process involves a relative value assessment of both fundamental and ESG risks. The credit team collaborates with in-house sustainability research analysts to find opportunities in industries and companies that exhibit a combination of particularly strong fundamentals and favorable ESG factors.

Disclaimer: Investment in mutual funds involves risk, including possible loss of principal invested. You could lose money on your investment in the Fund or the Fund could underperform because of the following risks: the market prices of bonds held by the Fund may fall; individual investments of the Fund may not perform as expected; and/or the Fund's portfolio management practices may not achieve the desired result. Bond funds are subject to interest rate risk and credit risk. When interest rates rise, the value of fixed-income securities will generally fall. In addition, the credit quality of the securities may deteriorate, which could lead to default or bankruptcy of the issuer where the issuer becomes unable to pay its obligations when due. High-yield, high risk bonds, which are rated below investment grade, can involve a substantial risk of loss because they have a greater risk of issuer default and are subject to greater price volatility than investment grade bonds and may be illiquid. The Fund’s use of derivatives such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than offset risk. An active trading style can result in higher turnover (exceeding 100%), may translate to higher transaction costs, may increase your tax liability, and may affect Fund performance. The Fund is non-diversified and may be more volatile than a diversified fund.
