Sustainable, Responsible and Impact Mutual Fund and ETF Chart

Fund Profile:
Calvert Global Energy Solutions Fund I

General Fund Information
Ticker: CAEIX
Assets under management (AUM): $68.85M (in US$ millions)

General Fund Type: International, Global, Foreign

Specific Sizes or Types of Investments: Natural Resources

Financial Objective: The Fund seeks long-term growth of capital through investment in equity securities of companies active in the sustainable energy solutions sector.

Specific ESG Focus: Addressing the climate change crisis is essential to ensuring a sustainable future. A shift away from fossil fuels requires a sharp focus on developing sustainable energy solutions, energy efficiency, and the broadest array of energy options. The Fund provides an investment opportunity for climate change solutions and renewable energy development. The Fund seeks to invest in companies that are market leaders in sustainable energy solutions or that are significantly involved in the sustainable energy solutions sector. Sustainable energy solutions include renewable energy (solar, wind, geothermal, biofuel, hydrogen, biomass and other renewable energy sources that may be developed in the future), technologies that enable these sources to be tapped, and services or technologies that conserve or enable more efficient use of energy. The Fund will invest in ways consistent with Calvertâ€™s philosophy that long-term rewards to investors will come from companies and other entities whose products, services, and methods contribute to a more sustainable future. The Fund will focus on environmental, social, and governance (ESG) factors that promote and encourage sustainable solutions.

**Disclaimer**: Investment in mutual funds involves risk, including the possible loss of principal invested. The Fund is subject to the risk that stocks that comprise the energy sector may decline in value, and the risk that prices of energy (including traditional sources such as oil, gas or electricity) or alternative energy may decline. The stock markets in which the Fund invests may also experience periods of volatility and instability. In addition, shares of the companies involved in the energy industry have been more volatile than shares of companies operating in other, more established industries. Consequently, the Fund may tend to be more volatile than other mutual funds. Lastly, foreign investments involve greater risks than U.S. investments, including political and economic risks and the risk of currency fluctuations.
