Calvert believes that there are long-term benefits in an investment philosophy that attaches material weight to the environment, workplace relations, human rights, Indigenous Peoples’ rights, community relations, product safety and impact, and corporate governance and business ethics. Calvert also believes that managing risks and opportunities related to these issues can contribute positively to company performance as well as to investment performance. Each Fund has developed sustainable and socially responsible investment criteria, detailed below. These criteria represent ESG standards which few, if any, organizations totally satisfy. As a matter of practice, evaluation of a particular organization in the context of these criteria will involve subjective judgment by Calvert and the Subadvisors, drawing on the Fund’s longstanding commitment to economic and social justice. All sustainable and socially responsible investment criteria may be changed by the Board of Trustees/Directors without shareholder approval.

**Disclaimer**: Investment in mutual funds involves risk, including possible loss of principal invested. You could lose money on your investment in the Fund or the Fund could underperform because of the following risks: the market prices of stocks held by the Fund may fall; the individual investments of the Fund may not perform as expected; and/or the Fund's portfolio management practices may not achieve the desired result. Prices of small cap stocks can be more volatile than those of larger, more established companies. Small cap companies are more likely to have more limited product lines, fewer capital resources and less depth of management than larger companies.
